

Formula for calculating panel widths:  
 BI-PARTING  
 Gross opening width - 5mm = .....  
 Then divide by the number of panels required  
 remembering that there are 2 no. half panels.  
 The maximum panel width is 900mm.  
 SINGLE WING  
 Gross opening width + 47.5 = .....  
 Then divide by the number of panels required  
 remembering that there is 1 no. half panel.  
 The maximum panel width is 900mm.
